### DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (US 6,238,119)

Lin ('119) discloses a photo-pen with the function of displaying a phone calling and illumination in the dark comprising of a pen body 2, first and second laser elements 32, 33. A battery 30, a circuit board 31 that houses the laser elements, a switch key 310 that switches between the first and second laser elements (lines 51-58, column 20). Lines 30-34, of column 2 teaches how the laser elements can be of different colors and the laser elements emitting different frequencies of visible light which may be that of laser diodes and the first laser elements 33 are mounted in a parallel fashion on the circuit board (figure 1)

Lin does not teach or suggest that the weight of the pens to be 450 grams or less.

Therefore it would have been a matter of design choice to construct the pen to be of a weight of less than or equal to 450 grams since it is old and well known in the art that pens are light weight and easily carried in one pocket or purse.
